CAREER OBJECTIVE

- Motivated Electronics and Communication Engineering student with hands-on experience in embedded systems, IoT, and circuit design. Seeking opportunities to apply practical electronics knowledge, work on real-world engineering problems, and grow as a core ECE professional.

TECHNICAL SKILLS

- **Programming Languages:** C, Python
- **Hardware Description Language:** Verilog HDL
- **Embedded Systems:** Nordic nRF, Zephyr RTOS, ESP32
- **Tools & Software:** KiCad, Multisim, Xilinx, MATLAB, Keil uVision, EDA Playground
- **Backend & Cloud:** Firebase, REST APIs

EDUCATION

K S RANGASAMY COLLEGE OF TECHNOLOGY

2023-2027

- Bachelor of Engineering(Electronics and Communication Engineering)
- CGPA - 7.6 (Up to 6th Semester)

DIAMOND JUBILEE HIGHER SECONDARY SCHOOL

2021-2023

- HSC
- Percentage - 70.5%

BEST MARTICULATION SCHOOL

2020-2021

- SSLC
- Percentage - 100%

LANGUAGES

- English
- Tamil

MEMBERSHIP

- IETE (The Institution of Electronics and Telecommunication Engineers)

AREAS OF INTEREST

- VLSI Design
- Embedded System with IoT

PROJECTS

Air Travel Assistance Band (Aerolinkers) | VVDN Technologies Product 360 Initiative

- Developed an end-to-end wearable IoT solution for international travelers, providing indoor navigation, multilingual assistance, real-time flight updates, and family synchronization.
- Designed a custom multi-layer PCB and implemented embedded firmware using Zephyr RTOS on nRF7002DK, integrating Wi-Fi, BLE-based indoor localization, OLED display, haptic alerts, and child proximity detection.
- Built secure backend services in Python for authentication, device management, and real-time data synchronization.

Portable Oxygen Monitoring Device

- Designed and developed a portable oxygen monitoring device using ESP32 and oxygen sensors.
- Implemented real-time sensing, processing, and display of oxygen concentration levels.

Smart Irrigation System – Improved water efficiency using ESP32 and soil moisture sensing.

Audio Amplifier – Achieved low distortion and high sound clarity for audio applications.

Water Level Indicator – Prevented overflow and dry-run conditions in water tanks.

ONLINE CERTIFICATION COURSES

NPTEL

- English Language for Competitive Exams successfully completed on April 2024.
- Introduction to Industry 4.0 and Industrial IoT successfully completed on April 2025
- Introduction to Privacy and Security in Online Social Media successfully completed on April 2025

INTERNSHIP

- Completed Embedded System Developer Virtual Internship at Microchip Technology.
- Gained exposure to embedded firmware development and microcontroller-based applications.

ACHIEVEMENTS

- Selected for Product 360 Prototype Development Program.
- First Prize – Mini Project Contest (DC to AC Converter).
- Completed Microchip Embedded Systems Internship.
- Participated in Skill-Based Domain Hackathon and developed an Industrial Temperature Monitoring System.
